

TOWN OF MONROE

OFFICE OF THE FIRST SELECTMAN

COVID-19 Pandemic Update February 19, 2021

CASE RATE UPDATE

- Case rates continue to improve here and nationally. Monroe is now averaging just under 4 new cases per day.
- Our 2-week case rate is now 19.8 cases per 100,000 population.
- As of yesterday's report, Monroe has had 1,019 cases, and 12 deaths, since the start of the pandemic.

TESTING

- COVID-19 testing is now available daily in Monroe at two urgent care centers: DOCS Urgent Care on Route 25 and Hartford Healthcare / St. Vincent's Immediate Care on Route 111. Both are offering appointments and walk-in testing.

VACCINATION

- Vaccination efforts continue for individuals over the age of 65. There continues to be a variety of options to make an appointment. Please go to www.MonroeCT.org/COVID-19 for more information on the various options available.
- Over 2,300 Monroe residents, or about 12% of our population, have received at least one vaccination.
- Clinics continue to be run by the Monroe Health Department, scheduled through VAMS.
- In some circumstances, we may have a very small number of extra doses become available due to a missed appointment or extra doses in a vial. Starting on Monday, the COVID-19 page on the Town website will have a link to signup to be on a vaccination "standby" list for a specific day. To be on the standby list, you must be registered in VAMS and be available to be vaccinated within the hour if called. Details will be provided on the signup page.
- The Governor has advised that further details on the next eligibility group, including frontline essential workers and those with certain health conditions, will be announced on Monday.

Thank you and have a good weekend,

A handwritten signature in blue ink, appearing to read "Ken Kellogg".
